

JAI ME VALLS ANDRÉS

Industrial Engineer Designer and Product Developer

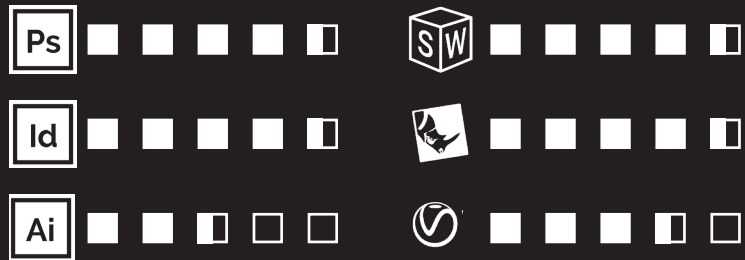

BIOGRAPHY

Hi, I'm Jaime Valls. I'm an Industrial Engineers designer and product developer from Valencia, Spain. I graduated in Castellón, Spain at UJI, Universidad Jaime I. I'm currently finishing an official Master in Product Design at CEU Cardenal Herrera in Valencia. Now I'm looking for an opportunity to prove myself. I consider myself Creative, restless, always looking for new challenges, challenges where to grow professionally and personally.

PROJECTS

TORINO

TORINO is the result of the final project of the nautical subject of the master's degree. Design of a glider-type boat inspired by Lamborghini cars.

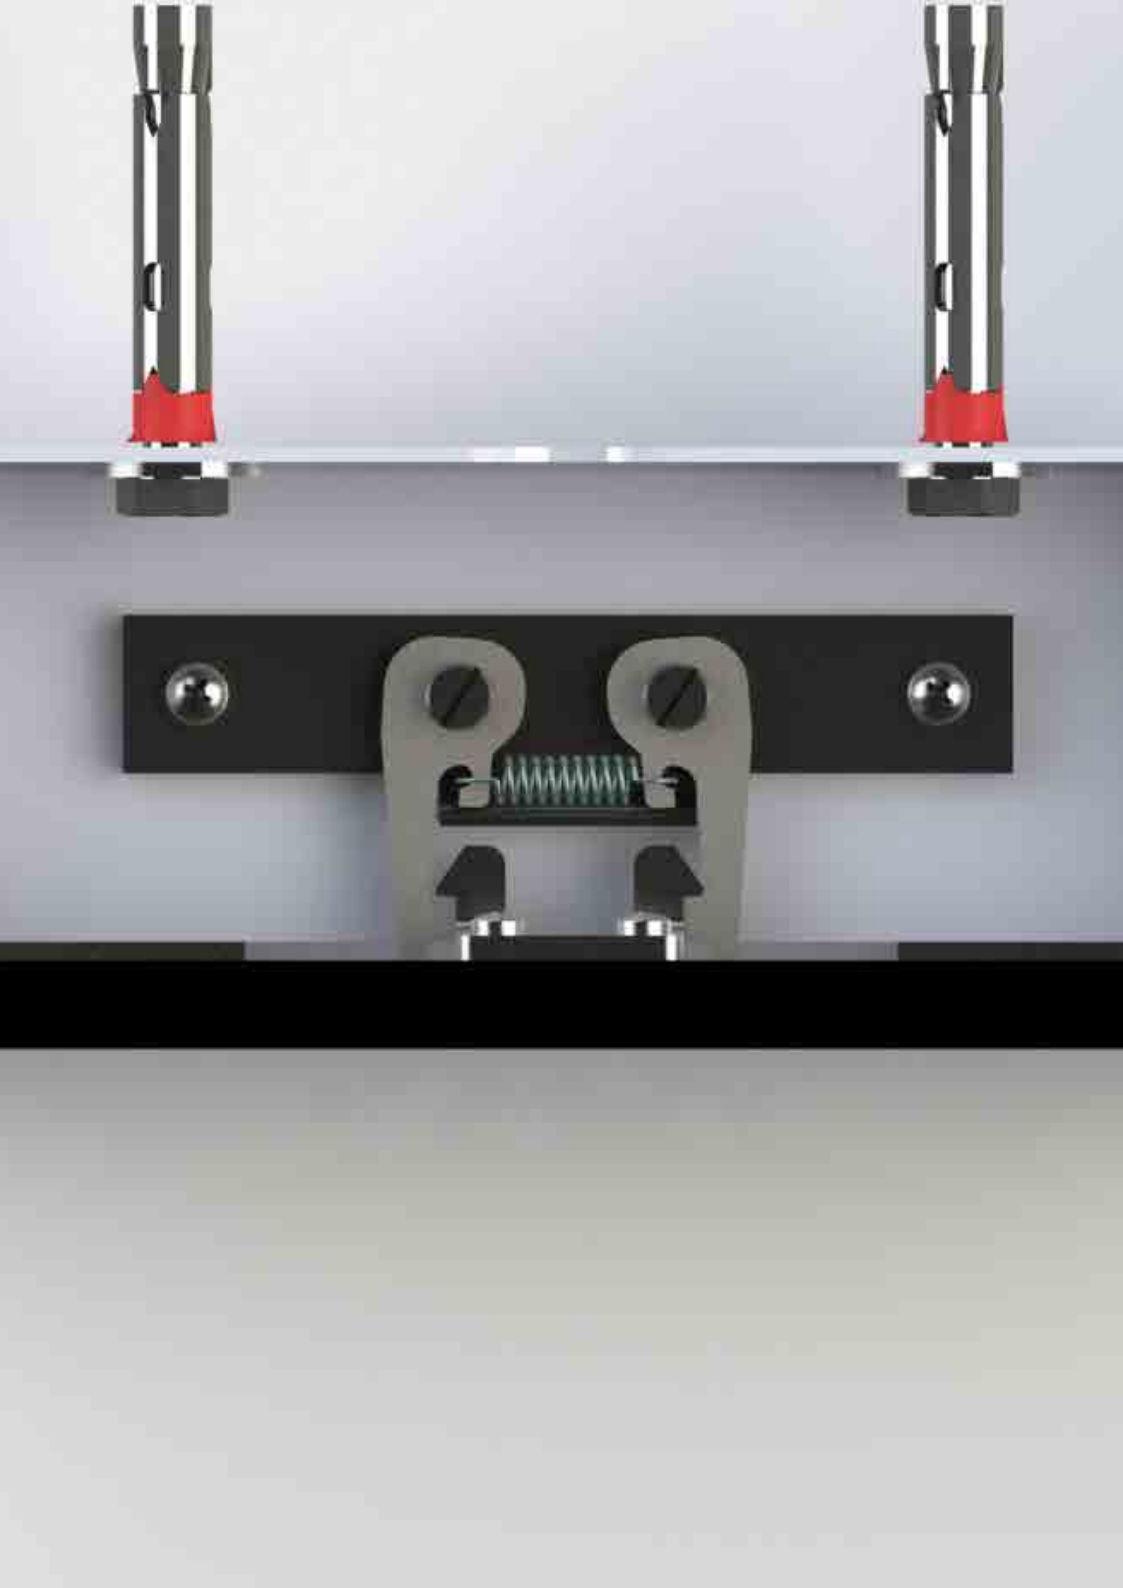

VIDEO DOOR ENTRY PANEL

As a final project of my degree in Industrial design and product development. I developed a video door entry panel with connection capacity for the user's mobile phone, for the company in which I did my internship.

I designed a new product following the line of the company and an assembly and installation system. I also studied the manufacturability and costs of a possible production.

RUNNINGBOARD

PROPOSED CHILDREN'S TOY, a ride-on designed for children from 1 to 4 years old, which also serves as a blackboard so that they can decorate and paint it to their liking.

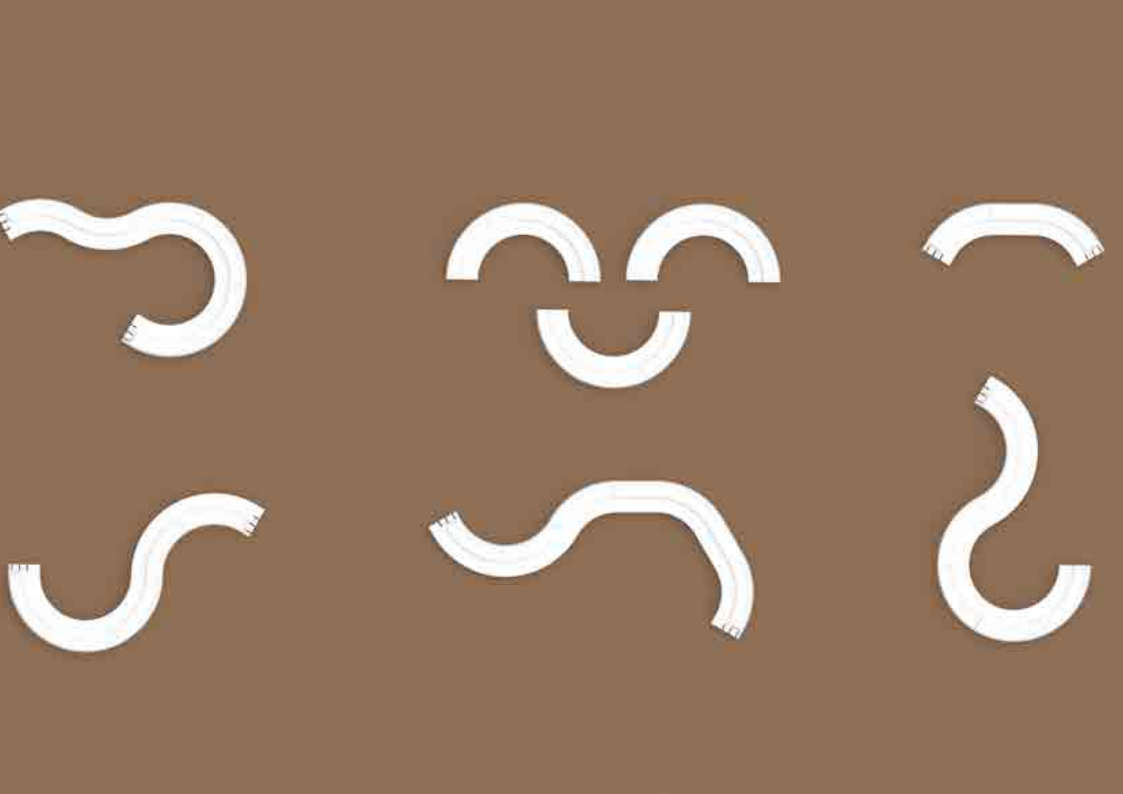

MARINA

MARINA is a design proposal for a public space located in “La Marina” in Valencia, Spain.

It consists of four modular benches with planters and an umbrella, which allow the creation of spaces with vegetation and rest areas.

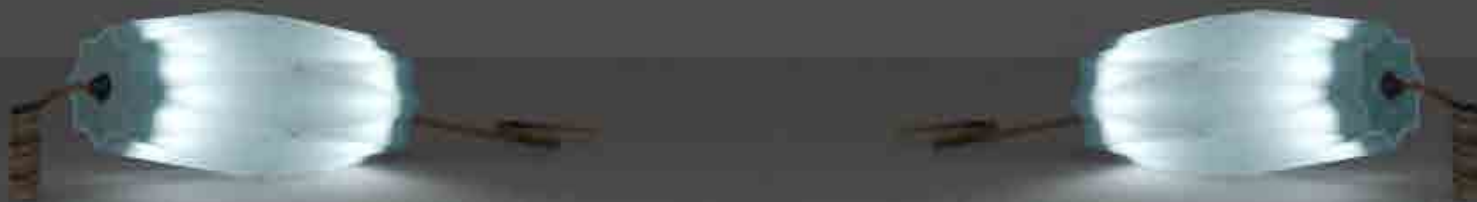

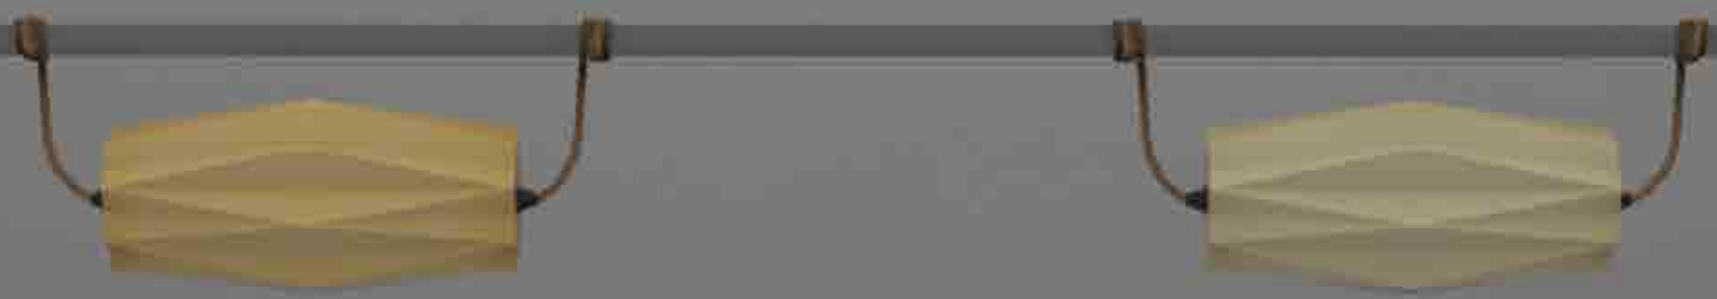

PORIGON

PORIGON is a lighting design proposal for a portable lamp intended mainly for outdoor spaces.

It is characterised by its origami shape in the lampshade and its two rope ends which allow you to place it in different places.

TERRETA

TERRETA is a design proposal for a typical Valencian drink, called Agua de valencia. Project carried out together with Céu Amorim in which both the bottle and the graphics of the product were developed.

EGGS PACKAGING

PACKAGING PROPOSAL for an egg carton. Project carried out together with Martina Rios, we have managed to develop a primary packaging made of a single sheet of cardboard, reducing the excess of material and above all of plastics.

We have also developed a graphic according to the new style.
